

Practical instances: speedup over the optimized baseline

Speedup; initialization excluded

Instance	Bits	Baseline	Minimum degree	Maximum update	Spectrum update
PRESENT	4	PEIGEN	0.42×	1.66×	0.83×
AES	8	PEIGEN	1.22×	8.24×	2.94×
CLEFIA S0	8	PEIGEN	2.40×	6.52×	2.96×
CLEFIA S1	8	PEIGEN	1.30×	7.96×	3.25×
MISTY1 S9	9	Bitwise	19.32×	5.61×	2.72×
MISTY1 FI	16	Bitwise	992.17×	36.58×	4.25×

Five repeats per instance. FI uses fixed subkey 0.

Update measurements follow fixed transpositions starting from each named instance.
